

Treated Pine H4 GL8 F/J Lam Posts

The robust finger jointed laminated H4 Treated Pine Posts are engineered, protected and ready to use. Chosen for its straightness, weather endurance and reduced twisting contrast to natural wood.

H4 Treatment offers resilient guard against decay, termites and borers ideal for pergolas, fence posts and verandas. CCA Treatment is applied to process timber to the H4 level for exterior inground uses. This pine must comply with GL tables to ensure GL8 is suitable for the proposed structural application.

Stress Grade: GL8

Joint Group: H4 Finger Jointed Laminated for straightness

Tone: Pale Green/Blue

Lengths: 2700 - 6000mm
