

Thermally Modified Timber Profiles

Thermory's thermally stabilised timbers offer a range of natural or pre-finished, ready to install, cladding and lining solutions. Featuring spruce and pine ranges that are responsibly sourced from sustainably grown plantation timbers. These timbers are thermally modified using heat and steam, to produce a durable, high performing product range that carries a Class 1 durability rating to perform for decades in Australian conditions.

Thermory modifies the timber for increased durability and dimensional stability in a range of natural and prefinished, ready to install exterior cladding and interior lining solutions.

Spruce Cladding Intense: Drift Black Pearl C26

Thermory® timber cladding and lining in a Drift finish offers the rustic look of reclaimed timber, with the performance of a thermally modified timber product. Ideal for a weathered or country design aesthetic, Black Pearl offers a gently worn grey timber tone. Sourced from sustainably managed plantations, the Drift range delivers exceptional durability and dimensional stability to meet the demands of Australian conditions.
