

# Hoop Pine Plywood

A Plywood produced in Australia crafted from plantation grown Australian Hoop Pine veneers. Made to comply with Australian Standards depending on the selected veneer grade and glue bond. Features a warm blonde hue, smooth texture, clean grain and is well-suited to many applications. Ideal for structural and appearance-grade needs in residential or commercial projects.

## Applications

Wall & ceiling linings, joinery, furniture, school office and shop fittings.

## Specifications

|                         |                                                            |
|-------------------------|------------------------------------------------------------|
| Name:                   | Hoop Pine Plywood (Araucaria)                              |
