

Ventbat™ Structural Cavity Batten

Ventbat™ significantly enhances the performance of both vertical and horizontal cladding systems, especially when paired with Stagwood's KDHW and Thermory Cladding products.

Its castellated profile and sloped top are intelligently designed to promote ventilation and drainage which are key factors for long-term durability, water resistance and overall building protection.

By providing added structural support to external cladding, Ventbat™ also reinforces the stability of the building envelope.

It is H3 treated and fully compliant with construction standards offering weather resistance, dimensional consistency and compatibility for a wide range of cladding applications.

Features & Benefits

Name:	Ventbat™ Structural Cavity Batten
Barcode Number:	9339306004919
Certification:	This product is made of FSC®-certified and other controlled material
Structural Grade:	SG8/F7
Treatment:	H3 LOSP
Material:	H3 Treated Finger Jointed Radiata Pine
Batten Size:	70 x 35 x 5700mm Standard (70 x 35mm) fits typical construction sizes
Application:	For vertical and horizontal cladding on timber, masonry or steel structures
Installation/Compliance:	Fits up to N4/C2 wind zones at max 900mm spacing when face fixing. Compliant with drainage requirements of the National Construction Code.
Termites:	Resistant
